

A detailed image of a falcon in flight, positioned on the left side of the frame. The falcon is shown from a side profile, facing right, with its wings fully extended. The feathers are intricately detailed with various patterns and colors, including shades of grey, white, and black. The background is dark, with a series of horizontal, slightly wavy lines in a golden-brown color that create a sense of motion and depth. The overall composition is clean and professional, typical of an aviation advertisement.
